Forecast for Saturday 05 Nov 2022

Weather: Early clear spells but cloud soon increasing with outbreaks of rain developing through the early hours. The rain, heavy for a time around dawn, clears by mid-morning with brighter, drier conditions spreading southeast and long sunny spells developing for the afternoon. Dry start to the evening with long clear spells but increasing cloud brings a risk of showers towards midnight.

Chance of cloud-free hill tops above 700m: Close to zero at first then becoming close to 100% by late morning, chances fall again towards midnight.

Low cloud and visibility: Periods or persistent cloud above 450-600m, with patches below, at first, the cloud then lifting and breaking to leave little or no cloud, above or below the summits, by late morning. Away from cloud, visibility several kilometres in rain but becoming very good or excellent by late morning.

Meteorologist's View

Gusts around 55mph over ridges and summits around dawn. Significant chill on summits, especially in early rain.

Forecast for Sunday 06 Nov 2022

Weather: Outbreaks of occasionally heavy showery rain clear southeastwards through the early hours to leave a bright morning with some good spells of sunshine. However cloud will bubble during the late morning with occasionally heavy afternoon showers developing in the afternoon.

Maximum wind: Southerly or southwesterly 20-25mph, gusts around 40mph over ridges and summits, increasing a little through the evening.

Chance of cloud-free hill tops above 700m: Close to 100% at first falling to 75% by late morning.

Low cloud and visibility: Occasional cloud above 600-750m developing, lowering briefly to 450m in or near any heavier showers. Outside of cloud visibility very good falling to several kilometres in showers.

Temperature: **Valleys:** Around plus 5 or 6 Celsius in early hours rising to plus 12 or 13 Celsius by day.
At 700m: Around plus 5 Celsius
Freezing level: Above the summits.
